

Please support and continue to allow New Jersey (and other states) to have more stringent "Do Not Call" regulations than the national "Do Not Call" program. Before the national Do Not Call program, I was inundated by telemarketers. When the national program went into effect, the situation improved, but I still got many unwanted calls.

When the NJ program went into effect, the annoyance factor was further reduced (though still not eliminated). Please do not take away NJ's ability to regulate unsolicited phone calls.
